- Domain: World military power
- Dataset:
    - Attributes: Number of armoured vehicles (quantitative), Country (categorical)
    - Source: https://www.kaggle.com/datasets/prasertk/military-power-by-country-2022
    - Author: Prasert Kanawattanchai
- No data transformations
- A choropleth map was used as it encodes a quantitative attribute related to a country quite well. The dataset includes spatial data related to countries rather than longitude/latitude coordinates, so other map types would not make sense.
